This project, ISA Officer's Login, is a multi-role, permission-based platform designed to manage the activities, roles, and interactions within an organization. It provides secure login and access control for various user roles, such as administrators, officers, and volunteers. Key features include user management, role-based access control, profile management, and content management for the organization's main page. Through this system, authorized users can manage messages, update officer details, track points, view reports, and modify organizational settings, making it a comprehensive tool for efficient operational oversight.

# **Admin Dashboard:**

User profile information includes details such as Name, Officer Position, Joining Date, Total Points, status counts for Active, Inactive, and Retired Officers, daily message trends, and a donut chart representing Officer Points.

**Messages:** Displays all messages or form submissions from website visitors and internal officers. Options to export or delete messages are accessible by default to the admin and any user with the appropriate permissions.

#### Profile:

- 1. **My Profile:** Any user can update their own profile information, except for joining date and position, which can only be modified by an administrator or a user with the necessary permissions.
- **2. Update Officer Details:** Administrators or users with the required permissions can update information for any officer.

## **User Management:**

- 1. All Officers: Shows a list of all officers/users.
- 2. Add New Officer: Administrators or authorized users can add, edit, and remove non-admin users.
- **3. Officer's Points:** Administrators or authorized users can adjust an officer's cumulative points by adding or subtracting points.
- **4. Change Password:** Administrators or authorized users can change the password of any non-admin user.
- **5. Retire Officer:** Administrators or authorized users can retire any non-admin user at the end of their service period.
- 6. Retired Officers: Administrators or authorized users can view and reinstate retired officers.

### **ISA Settings (Role-based Access Control):**

- 1. Upload Logo: Administrators or users with access rights can update or add the website logo.
- 2. Officer Position: Administrators or authorized users can add, edit, or delete positions within the organization.
- 3. Degree: Administrators or authorized users can add, edit, or delete existing degrees/majors.
- **4. Enable/Disable Office:** Administrators or authorized users can enable or disable a user's portal access/login.
- **5. User Permissions:** Administrators or authorized users can add or remove permissions for specific roles (admin, officer, volunteer, user) or individual users.

# **ISA Main Page Content:**

- **1. Events:** Administrators or authorized users can add, edit, delete, publish, or unpublish events on the main page.
- 2. Resources: Administrators or authorized users can add, edit, delete, publish, or unpublish resources on the main page.
- **3. Gallery:** Administrators or authorized users can add, delete, publish, or unpublish gallery photos on the main page.

#### **Email & Notifications:**

- 1. **Officer's Birthday:** Highlights an officer's birthday in green if it's within 7 days, and in yellow if it's within a month.
- 2. Birthday History: Maintains a record of birthday wish emails sent to all users.
- 3. **Email Categories:** Allows adding, editing, and deleting email categories, such as Birthday Wishes, ISA Events, New Officer Onboarding, Email Change, Password Change, Position Change, and more.
- 4. **Email Templates:** Enables adding and deleting templates as needed. Options include auto-send toggling and scheduling emails on a daily, weekly, monthly, quarterly, yearly, or custom date basis.
